The Honorable John McCain
Chairman
Senate Committee on Armed Services
Russell Senate Building, Room 228
Washington, DC 20510

The Honorable Mac Thornberry
Chairman
House Committee on Armed Services
2216 Rayburn House Office Building
Washington, DC 20515

The Honorable Jack Reed
Ranking Member
Senate Committee on Armed Services
Russell Senate Building, Room 228
Washington, DC 20510

The Honorable Adam Smith
Ranking Member
House Committee on Armed Services
2216 Rayburn House Office Building
Washington, DC 20515

Dear Chairmen McCain and Thornberry and Ranking Members Reed and Smith:

As you work to develop your respective versions of the fiscal year 2019 National Defense Authorization Act (NDAA), we encourage you to refrain from including any language that would have a detrimental impact on research at the Congressionally-Directed Medical Research Program (CDMRP) and other medical research conducted by the U.S. Department of Defense (DoD).

Last year, the fiscal year 2018 NDAA reported by the Senate Committee on Armed Services and ultimately approved by the Senate included provisions that would have individually and collectively restricted, if not outright prohibited, medical research on diseases and disorders that affect our nation’s men and women who serve or have served in the U.S. Armed Services. These provisions (sections 733, 891, 892, and 893 of the Senate bill) would have restricted the types of research that could be funded, and added burdensome contracting and auditing requirements designed for large weapons system contracts. Moreover, one of these provisions (Section 733) would have affected all medical research at DoD, not just the CDMRP.

In response to the inclusion of this language last year, the U.S. Army’s Medical Research and Materiel Command issued a memorandum that stated:

“This language will impact force readiness and medical providers’ readiness.... Impacts on military medical training programs will negatively affect the readiness of our military health care providers.”

Because the Senate version of the bill is not marked-up in public, our organizations did not have a chance to respond to this language until after the bill was reported from committee. Furthermore, an amendment to remove this language was filed in the Senate and cosponsored by more than half of the Senate, but was not given a vote on
the Senate floor. After passage of the bill, “Dear Colleague” letters asking for removal of this language in the House-Senate conference were circulated and signed by 54 Senators and 180 Representatives.

Thankfully, the final version of the FY18 NDAA did not include this language. This result was due in large part to an arduous four-month advocacy campaign by your constituents, who expended an enormous amount of time and energy to defeat language that a clear Majority in Congress opposed from the outset.

The strong level of bipartisan Congressional support for the defense health research programs is a beacon of hope to the military families, retirees, veterans and civilians who must cope with these diseases and disorders. We urge you to honor their concerns and refrain from including in this year’s NDAA any language that would restrict medical research at DoD.

We appreciate your prompt and urgent consideration of our request.

Sincerely,

AcademyHealth
