

The Doll Is Going to the Doctor

The doll is sick. Let's check her.

Check the doll's temperature.
Does she have a fever?

Check her blood pressure. Tell
her good job!

Now she needs some medicine.
Say, “Open wide!”

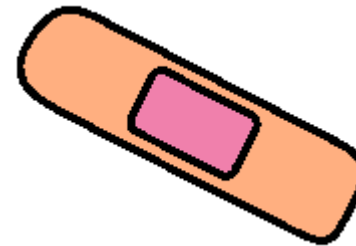

Give her a drink.

Now the doll needs a shot.

Now she needs a band-aid!

Check the doll's ears, nose and mouth.

Now the doll is ready to go into the hyperbaric oxygen chamber!

The doll is all done! Tell her,
“See you next time!”
